

1st Workshop on Homogeneity and Non-Maximality in Plural Predication and Beyond

Friday, November 18

14:50-15:00 CET 08:50-09:00 EST	<i>Introduction</i>
15:00-16:20 CET 09:00-10:20 EST	Omri Amiraz (Hebrew University of Jerusalem): Non-maximality and homogeneity in collective predicates and absolute adjectives Diego Feinmann (École Normale Supérieure): Mind the gap: Absolute adjectives give rise to homogeneity effects
16:20-16:50 CET 10:20-10:50 EST	<i>Break</i>
16:50-17:30 CET 10:50-11:30 EST	<i>Slot for panel discussion (more information TBA)</i>
17:30-18:10 CET 11:30-12:10 EST	Flavia Nährlich and Angèle Bernard (Université de Nantes): Plural definites in positive and negative contexts: a cross-linguistic study on homogeneity effects in French and German
18:10-18:40 CET 12:10-12:40 EST	<i>Break</i>
18:40-20:00 CET 12:40-14:00 EST	Jéssica Mendes (University of Maryland): Habituality via pragmatic strengthening: new evidence from subtractives Jordan Chark (Leibniz-ZAS Berlin): Homogeneity removal as a local phenomenon

Saturday, November 19

15:20-16:40 CET 09:20-10:40 EST	Clemens Mayr (University of Göttingen) and Yasutada Sudo (University College London): Domain variables, homogeneity projection, and two notions of entailment Jad Wehbe (MIT): Revisiting presuppositional accounts of homogeneity
16:40-17:10 CET 10:40-11:10 EST	<i>Break</i>
17:10-17:50 CET 11:10-11:50 EST	<i>Slot for panel discussion (more information TBA)</i>
17:50-18:10 CET 11:50-12:10 EST	<i>Break</i>
18:10-19:30 CET 12:10-13:30 EST	Moshe E. Bar-Lev (Tel Aviv University): Homogeneity and Underspecification with non-distributive predicates Mathieu Paillé (University of Calgary): On quantificational force in conjoined and non-conjoined summative predicates, and its consequences for underspecification theories of homogeneity
